Consulting Engineers & Landscape Architects

## PROJECT:

Norfolk Park Regeneration, Sheffield

## CLIENT:

Miller Homes

## ARCHITECTS:

Baker Brown Mackay & HTA Architects

## BM SERVICES:

Environmental Design & Analysis  
& Landscape Architecture

## VALUE:

£120million (approx)

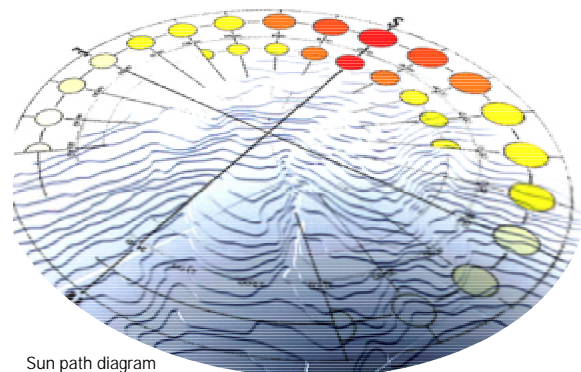

## DESIGN BRIEF

To assist HTA Architects with the preparation of design and development guidelines and an environmental and ecological masterplan for the regeneration of a large residential area close to central Sheffield.

## DESIGN INITIATIVES/ACTIONS UNDERTAKEN

Design principles included:

- Maximise existing topographical and landscape character.
- Create a landscape sympathetic to prevailing climatic and topographical conditions within the context of Sheffield.
- Create better links across site between communities/facilities and open space.
- Create functional, diverse and aesthetically interesting open space.
- Maximise the use of recycled/sustainable materials with a low embodied energy throughout the site.
